Illustrative External Debt/Internal Borrowing Projections

(Excluding short-term borrowing from the Chichester Harbour Conservancy)

The borrowing figures below reflect the Council's internal borrowing policy and the external debt projections for the current capital programme to 2028/29. Additionally, in the table below the Core Borrowing (New) includes £20m annual borrowing for the capital programme (excluding Economic Development schemes) from 2029/30 onwards.

The borrowing figures are split between the core capital programme and Economic Development projects and core borrowing covers the whole of the capital programme excluding Economic Development.

The County Council's Liability Benchmark projections forecast that the Council will be required to externally borrow for the capital programme in 2025/26. Additionally, based on the forecast DSG deficit as set out in the DfE Management Plan, cash reserves previously funding the County Council's internal borrowing will be fully utilised from 2026/27 in funding future DSG deficits (as set out in the Management Plan). From 2026/27 therefore, no internal borrowing for the County Council's capital programme is available until such time that a funding solution for the ongoing DSG deficit is agreed.

The Council's capital financing budget is set in line with the assumptions above and any change to these assumptions will have an impact on the Council's revenue budget.
