

Summary of Proposed Changes to KPI Measures for 2024/25

The table below provides a summary of the proposed changes to the KPI measures for 2024/25 which are reflected in the Q1 Performance and Resources Report. These proposed changes are subject to agreement by Cabinet on 1st October 2024.

Table 1 – Proposed Changes to KPI Measures for 2024/25

KPI	Measure	2024/25 Revision Target/ Amendments	Reason for Updated Measure/ Target
55	Chlamydia – proportion of females aged 15 – 24 screened	Change in measure to align to national data reporting and targets. Aim high measure	It is proposed that this KPI is amended due to a change in the national indicator within the Sexual and Reproductive Health Profiles. The Office for Health Improvement and Disparities (OHID) data set, focuses on the proportion of females screened rather than all persons.
